Abstract of JP2001049208

PROBLEM TO BE SOLVED: To provide a non-halogen flame retarded adhesive tape excellent in thermal deformation resistance and oil resistance. **SOLUTION:** A non-halogen flame retarded adhesive tape of this design consists of a substrate 3 in which a first layer 1, comprising resin composition in which an inorganic flame retardant agent and a crosslinking agent are added to a mixture of polyethylene/ethyl acrylate and polypropylene, is overlaid by a second layer 2, comprising a resin composition in which an inorganic flame retardant agent and a crosslinking agent are added to polyethylene/ethyl acrylate, and an adhesive layer 4 which is laid on the second layer 2.
